Program

Outcomes of

Political Science

Programme specific outcomes: Political Science

Political science is excellent preparation for effective citizenship. Studying political science grounds the students of Post graduation in the basics of political participation and prepares them to take part in the political life of their communities and the nation.

Political Science is a discipline that uses different approaches. Our courses train the student in a number of different critical skills that help them succeed in almost any career.

The political theories train the Scholars in analytical thinking and essential skill for almost all attractive careers. Not surprisingly the Alumni of Political Science can be found succeeding in many different Professions and organisations; including law and business. The CEO of several fortune 500 companies are Political Science majors.

Some find government so fascinating that they make government service their career while many go for other professions such as law which require the students to go to a professional school for postgraduate training.

The intellectual skills required in Political Science are a great foundation for Political success.

The importance of study of the program in post graduation lies in the fact that we all live within a political system and are affected by the changes in the Global and local political economy.

With the advent of globalisation there has been a concomitant rise in the interest taken by the people of the world in understanding the political systems of other countries. Hence political scientists become valued and important as they provide the lens through which we can understand the Global political economy. Our Institution provides graduation and post graduation degrees in Political Science which mirrors the heightened interest in Political Science as a field of study. The study of post graduation also makes the student good political leaders with a visionary attitude.
